VARMAKELDA

Varmakelda er eitt gátuført náttúrufrýbrigdi í økinum. Vatnið her er heitari enn vanligt og sigst at veita heilsubót. Í gomlum døgum leitaðu fólk sær til kelduna eftir vatni, tá heilsan bilaði. Keldan sigst vera heitast náttina millum 3. og 4. juli, tá er vatnið umleið 18 hitastig.

Varmakelda rennur niðalaga í bakkanum. Leiðin oman á kelduna er at fylga varðunum og steyrunum.

THE WARM SPRING

The name, Varmakelda, translates to „warm spring“ and is the warmest natural spring in the Faroe Islands. Over centuries people from near and far have travelled to Varmakelda to drink its natural mineral water since the legend goes that the water has healing power.

The water is said to be at its warmest the night between 3th and 4th of July where the temperature is around 18° C (approx. 65° F).

To find the spring, please follow the cairns and poles almost down to the shore.
